

Panel L-6: Termination, Completion, and the Impossibility of Reversal

(A) Reality Stream vs Terminated: Entropy Requires Collapse

Entropy requires termination:
No termination \rightarrow No entropy

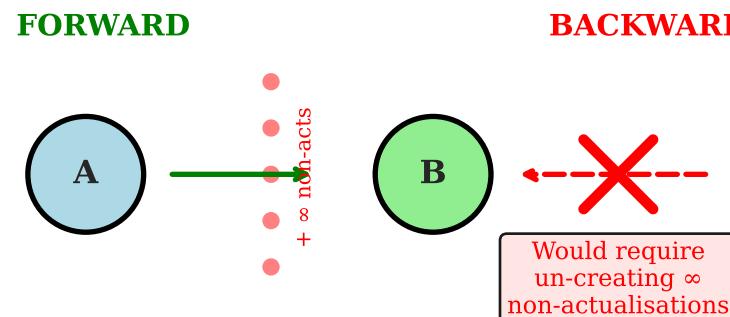

(B) Identity: Completion = Partitioning = Entropy Creation

Categorical Completion \equiv Geometric Partitioning
Both create boundaries \rightarrow Both create entropy

$$\frac{P_{\text{forward}}}{P_{\text{backward}}} = \prod_{i=1}^N \Omega_i \rightarrow \infty$$

(C) Why Reversal Fails: Cannot Un-Create Categorical Facts

Reversal is not about energy or velocity reversal
It requires un-creating categorical facts \rightarrow IMPOSSIBLE

(D) Asymmetry Grows Exponentially with Each Completion
